## Chassis

All models can be maneuvered easily and effortlessly – especially the **extramobile** model with larger castors for even more driving comfort.

„Extramobile“ chassis with practical central brake system\*\*\*

The „cosy“ version is supplied with an axle brake as standard and can be fitted with an optional central brake.

The „accessible“ model can be secured using an axle brake on the foot end. The castor locking brackets at the head end allow greater flexibility and more comfort when maneuvering and positioning the bed safely.

## Imitation leather in linen look | Softcover for headboard/footboard Df(x) or hotel design

We recommend using an original sample for the final colour selection, as the colours may differ from the printed illustrations.

# Smart Care - Digital care assistants

From a bed exit sensor system to a digitalisation platform

## SafeSense®

Autonomous, safe bed exit with individual call notification

### The bed exit assistance system

- Signals to care staff that the resident is about to leave the bed
- Works with an adjustable timer function (0 - 30 min) according to the traffic light principle
- Is linked to an automatic night light that is activated when the resident gets out of bed
- Can be connected to the call system
- Is available as a wireless and wired solution
- Can be retrofitted

### Bed exit assistance system – what does it actually mean?

SafeSense® signals to care staff that the resident has left or is about to leave the bed. This means that falls can be detected earlier than by routine checks.

In principle, a bed exit assistance system works like a kind of traffic light. This is a clear and very simple way to explain how it works:

-  Timer not activated
-  Timer activated  
→ e.g. 15 minutes to go to the toilet at night
-  Timer expired  
→ Signal to the call system

#### Article no.:

- 10-0871 SafeSense® 1 (integrated version)
- 10-0872 SafeSense® 2 (integrated version)
- 50-0982\* SafeSense® 1 Stand-Alone
- 50-0983\* SafeSense® 2 Stand-Alone

# Innovative, digital solution – SafeSense® 3

To support your care staff

Experts see the digitalisation of geriatric care as a great opportunity. With the help of technical innovations, care staff can be relieved. wissner-bosserhoff is currently focusing on three areas and the associated risks for the residents: Falls, decubitus and incontinence. The digital care assistant SafeSense® 3 can help to analyse the relevant data and, if necessary, prevent them.

## Real-time movement monitoring

for effective pressure ulcer prevention including data visualisation.

- Individual positioning interval setting
- Reduction of repositionings
- Reduction of control rounds

## Bed exit monitoring

for effective falls prevention including data visualisation.

- Individual nurse call timing
- Rapid response in the event of falls
- Reduction of the consequences of falls

## Moisture assistant (optional)

sensory support with monitoring and call function

- Detects moisture in the bed at an early stage
- Better protection against maceration and decubitus
- Certainty through real-time information instead of manual control

# Care monitor app

Your resident info at a glance

- Silent alarm
- Humidity 100 %
- Bed absence / Bed exit
- No relevant movement since 17 minutes
- Bed presence

Simple resident monitoring according to the „traffic light principle“

Sensor pad, connectivity box & signal line

Article no.:  
**10-0835** SafeSense® 3 retrofit kit  
**50-0880** SafeSense® 3 Stand-Alone – can also be used and retrofitted as a Stand-Alone version on many other care beds

For the full range of all of the accessories to the beds above please see scan the QR code

# Platform lifts

## Elevating Comfort and Convenience: Reliable Platform Lifts for Every Space

The Cibes A5000 platform lift is our most popular platform lift and for good reasons.

With the standard size of an A5000 accommodating to wheelchair users and can fit a young child's stroller.

The lift has potential for numerous applications from:

- Businesses and office buildings.
- Flats and apartments.
- Public facilities: shopping centres, supermarkets, libraries, leisure facilities, restaurants and more.
- Private homes.

### Modular A5000 platform lift

With eight different platform sizes to choose from, and the capability of withstanding a load of 4-5 people (400-400kg), the A5000 platform lift model is designed to fit seamlessly into any building. Whether your property is new or old, the A5000 can be customised from the footprint, down to finishing touches to suit your environment's aesthetics.

### Other Platform Lifts Available upon request

#### Cibes Cloud Plus

The Cibes Cloud Plus is part of Cibes next generation of lifts. This platform lift is a perfect example of Scandinavian design, where function, beauty and colour go hand in hand to make the lift integrate seamlessly with any private or public building.

#### Cibes Air

Specifically designed for implementation into home settings, the Cibes Air is highly customisable. Utilising Scandinavian design and function, the Air is not only aesthetically pleasing but reliable for your home.

Cibes 5000

## Cibes A4000

### Compact home lift

The Cibes A4000 internal home lift is a great design piece that has been expertly engineered to make life that little bit easier. No one should have to worry about being able to get up and down the stairs, especially in their own home. With an A4000 home lift by Cibes, you're able to freely explore varying levels of a property. This compact home lift requires minimal room, meaning you won't have to compromise too much space.

### Space-efficient home lift

Cibes A4000 Home Lift is small on the outside and spacious on the inside. The super-slim construction allows the lift to fit into very narrow spaces. With a lifetime of at least 25 years and Energy Label A, Cibes lifts are the most cost-efficient on the market, With technology simple so that the lift requires very limited maintenance.

### Home lift with panoramic views

The lift shaft of the Cibes A4000 lift for home use is available in full glass. The glass looks fantastic and preserves the light and airiness of your home. The space-saving footprint and 360-degree panoramic glazing of the lift shaft make Cibes lifts fit in any property, whether you are looking for an internal or external solution. The timeless Scandinavian design can be adapted to any architectural style or interior.

Cibes 4000

# Through Floor Lifts

Seamlessly Connecting Levels with Safety, Comfort, and Efficiency

Wessex VE Enclosed Lift

## The Wessex VE Enclosed Lift

The VE builds upon the already wide range of features the VM offers, with the additional functionality of being able to carry standing passengers, or multiple occupants, between floors. Since its release in 2015, the VE has since become popular internationally.

Despite its wide array of features, the VE is designed to be compact, easy to install, and perfectly suited to the home, just like all our through-floor home lifts!

The VE's enclosed design offers great benefits to the user. For example, the VE can safely carry multiple passengers. However, it hasn't forgotten its roots, it can still carry seated passengers with an internal seat option, and it can comfortably carry wheelchairs and passengers around.

Wessex VM Home Lift

## The Wessex VM Home Lift

The VM Home Lift is the most sold through-floor lift in the UK with over 10,000 units installed (and many more worldwide).

It comes in multiple different sizes to suit your needs and it complies and exceeds BS5900:2012 safety regulations, including in-car alarm, sensors on the top and bottom and fire seal.

Most importantly the VM is designed to offer unparalleled independence in your home. The internal controls are designed to be easy to use, and if they are not suitable, other control options are available. Almost anyone can use a VM totally unaided.

# Stairlifts

Enhancing Mobility and Independence, One Step at a Time

Platinum Ergo Straight

## Platinum Ergo Straight Stairlift

Manufactured here in Britain and designed to fit even the narrowest straight staircases, the Platinum Ergo Straight stairlift combines an ergonomic space saving seat with simplicity and reliability. Available in a max user weight of up to 160kg.

Featuring powered swivel the seat will automatically turn the seat to face the landing at the top of the stairs ensuring getting on and off of the stairlift is simple and safe.

The Ergo Plus seat design means this stairlift fits most straight staircases, even when other models can't!

Flow X Curved Stair Lift

## Flow X Curved Stairlift

Flow X single rail stairlift is the latest offering from the market leader when it comes to curved stair lifts. Combining an elegant design, versatility of configuration and unique patented safety features.

Flow X is the only stairlift on the market which is capable of auto swivelling the seat during the journey both up and down your staircase. This unique and patented feature makes the Flow X a specialist stairlift capable of fitting even the narrowest of staircases, straight, narrow, around corners or even spiral ones.

This compact stairlift has been designed in partnership with world renowned furniture designer Pearson Lloyd to produce a stairlift that not only contains industry leading technology but also breaks the mould on traditional stairlift design.

## Platinum Ergo Curved Stairlift

Manufactured here in Britain and designed to fit narrow staircases, the Platinum curve combines an ergonomic space saving seat with a slim rail design.

Available in a max user weight of up to 160kg with options for a powered swivel seat and with a lever linked footrest as standard.

Although this stairlift is designed to fit your stairs exactly, there are options that allow you to have this model designed, manufactured and installed within 10-12 days.
